Investor Deck Outline

Quenyx vOPS HUB — v1.0.0 RC1 · Document v2.0

Document Version	2.0
Software Version	v1.0.0 RC1
Applies To	Quenyx vOPS HUB v1.0.0 RC1
Classification	Confidential — Investor
Owner	Executive Office
Status	Released
Last Updated	2026-06-29
Document Type	Investor material

REVISION HISTORY

Version	Date	Notes
1.0	2026	Initial v1 pack (through Sprint 19).
2.0	2026-06-29	Aligned to v1.0.0 RC1; roadmap Phases 1–4 / Sprints 20–25.

Table of Contents

03 — Investor Deck Outline

Audience: Investors. **Format:** 25–35 slide outline. **No fabricated numbers** — any figure is marked (*ASSUMPTION — to be validated*).

1. **Title** — Quenyx vOPS HUB · the Virtual Operations Center · v1.0.0 RC1 (Phases 1–3 complete; Phase 4 underway).
2. **One-liner** — Operations + compliance + governable AI on one platform.
3. **Problem** — Operational blind spots, manual unprovable compliance, unsafe generic AI.
4. **Market pain** — Tool sprawl; regulators (e.g., NCA ECC) demand evidence; LLMs hallucinate.
5. **Who feels it** — Regulated enterprises in Saudi/GCC; CIO/CISO/compliance owners.
6. **Solution** — A modular HUB unifying monitoring (QynSight) + compliance (QynShield/QCIF) + a shared AI platform.
7. **Why now** — Convergence of observability, compliance pressure, and (newly) governable AI.
8. **Product overview** — Workspaces, modules, shared identity/billing/audit, shared AI.
9. **QynSight** — Monitoring, infra map, performance, capacity, alerts, service checks, agents. (*Production-ready, frozen.*)
10. **QynShield / QCIF** — Official corpus, NCA ECC-2:2024 v1, graph, mapping, evidence, gap, recommendations. (*Backend/API built.*)
11. **Compliance Copilot** — Cited, deterministic-first answers. (*Mock default; real-model flagged.*)
12. **Quenyx AI Platform** — Provider abstraction, skills, module adapters, capability catalog.
13. **Product screenshots** — [QynSight dashboard] [infra map] [QynShield executive] [Copilot citations] (*placeholders*).
14. **Architecture moat** — One source of truth (ops + corpus); UUID/provenance-first; fail-closed.
15. **AI moat** — Deterministic engines decide *what*; AI only *renders*; "no citation, no answer"; provider-agnostic.
16. **Data moat** — Operational telemetry + official compliance corpus reinforce each other.
17. **Modules map** — QynSight live, QynShield backend, others architecture-ready/roadmap.
18. **Safety & governance** — AI off by default; prompt logging & conversation persistence off; no tenant-evidence embeddings by default.
19. **Roadmap** — **Phase 4 (Enterprise AI Platform):** Sprint 20 Unified AI Workspace (delivered), Sprint 21 Operations Intelligence, Sprint 22 Asset & Knowledge Intelligence, Sprint 23 Automation & Response Intelligence, Sprint 24 Service/Notification/Cost Intelligence, Sprint 25 Enterprise Intelligence Platform. (No roadmap beyond Sprint 25.)
20. **Traction** — (*No customers/revenue claimed. Show delivery cadence: Phases 1–3 complete (QCIF Sprints 1–19 + AI Platform Foundation); Phase 4 started with Sprint 20.*)
21. **Business model** (*ASSUMPTION — to be validated*) — Per-workspace/per-module subscription; AI as a premium add-on. Plans/subscription tables exist in code.
22. **Pricing hypothesis** (*ASSUMPTION*) — Tiered by modules + AI usage.

23. **Go-to-market** (*ASSUMPTION*) — Land with QynSight monitoring; expand into QynShield compliance; AI as upsell; regulated GCC enterprises first.
24. **Competitive landscape** — Point monitoring tools vs GRC tools vs generic AI; Quenyx unifies.
25. **Team** — (*Insert actual founders/leadership.*)
26. **Hiring gaps** — (*Insert; e.g., frontend depth for QynShield UI, AI/ML, GTM.*)
27. **Technology & quality** — Disciplined sprints, audit report, safety-by-default engineering.
28. **Risks** — UI maturity of QynShield; AI/RAG pre-GA; single framework loaded; verification gaps (DB/tests) to close on CI.
29. **Mitigations** — Track-B audit + required actions; flag-gated rollout.
30. **Milestones (Phase 4)** — Sprint 21 → 25 (Operations, Asset & Knowledge, Automation & Response, Service/Notification/Cost, Enterprise Intelligence).
31. **Use of funds** (*PLACEHOLDER*) — Engineering, GTM, compliance content, infrastructure.
32. **The ask** (*PLACEHOLDER — insert amount/terms.*)
33. **Vision recap** — The Virtual Operations Center for regulated enterprises.
34. **Appendix** — Architecture diagrams (see Doc 05), QCIF model (Doc 06), AI platform (Doc 07).
35. **Contact** — (*Insert.*)

Reminder for the deck builder: do not insert TAM/SAM/SOM, revenue, ROI, benchmark, or customer figures unless independently sourced. Every business figure must carry an (*ASSUMPTION*) label until validated.
